1	Os 3 Quadrados	2
2	O Olho de Sauron	3
3	O Barco	3
4	A Casa	4
5	O Wolverine	5

1 Os 3 Quadrados

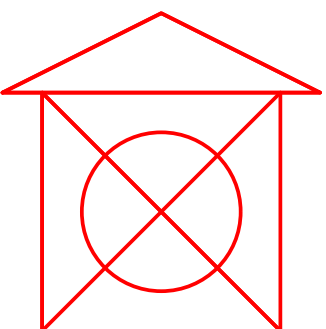

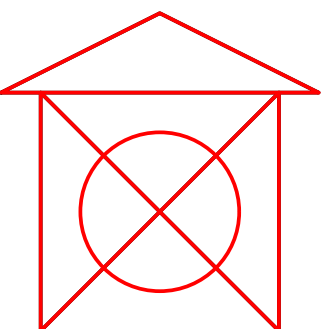

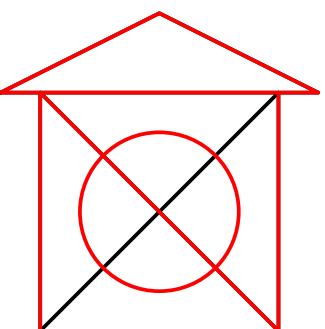

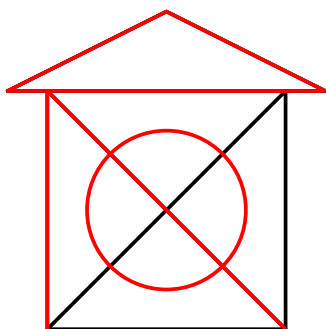

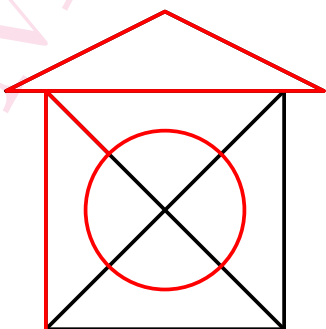

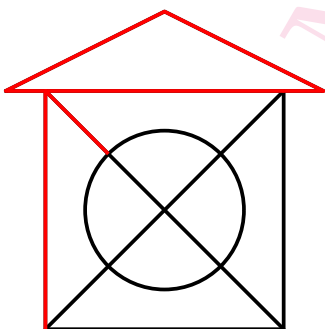

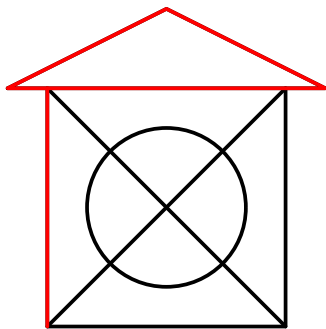

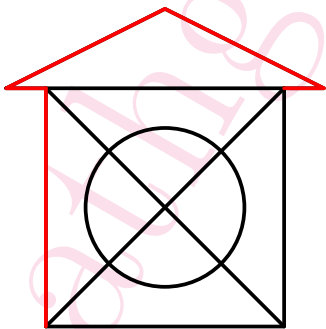

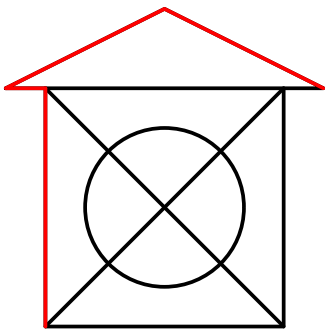

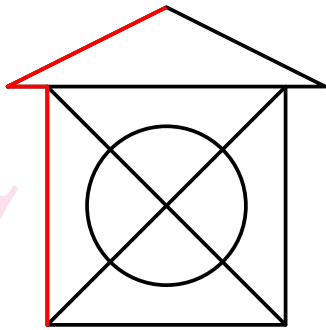

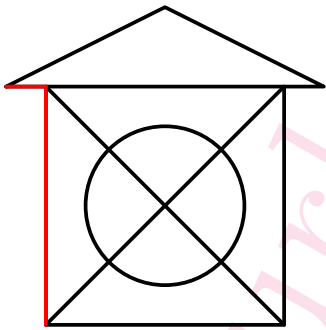

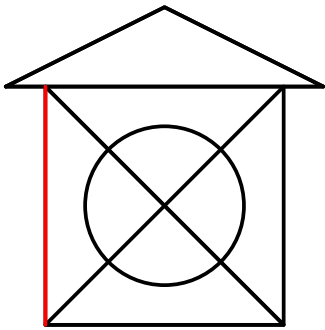

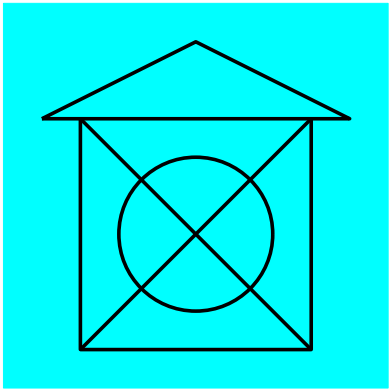

2 O Olho de Sauron

3 O Barco

O barco apresentou o mesmo problema do Wolverine pois para todo o contorno escolhido um linha sempre ficava “para trás” sendo impossível de percorrê-la sem passar num contorno já utilizado.

4 A Casa

5 O Wolverine

Depois de duas folhas de tentativas chegou-se à conclusão que o problema é difícil de resolver ☺. A principal reflexão é que nos casos onde houve maior aproximação de concluir o desafio sempre sobrava uma linha que para ser contornada iria exigir passar duas vezes pelo mesmo segmento, violando as regras estabelecidas.

Obs: A melhor justificativa nos casos que não resolvi é que aceito minha derrota depois de sucessivas tentativas!
